

# Make Your Own Button!!

Use the circle cutter to make your piece of art.

(You'll need to press down pretty hard)

Take the **bottom** piece (the one with the clasp) and

1. Place in receptacle that says "bottom" with **striped side facing up**
2. The bottom edge of the piece should be aligned with the notch in the receptacle

Take the **top** piece

1. Place in receptacle that says "top" with **striped side facing down**
2. Place artwork on top of the smooth part of the piece – make sure the top edge of your artwork is aligned with the notch in the receptacle
3. Place a plastic, mylar cover on top

Turn the top piece under the press (make sure the little, rubber, springy thing is straight up, Press down (the piece will disappear)

Turn the bottom piece under the press, Press down

Remove the button with the magnet/metal rod

Ta-Da!!
